USB Flash Drive Product Specification

FIPS 140-2 level 2 validated

256-bit AES encryption

Mandatory security of all files

Strong password authentication

**Lockdown mode after several
incorrect password attempts**

**Transfer speeds: 24MB/s Read
20MB/s Write**

Eclipt PICO *freedom*

USB flash drives are extremely popular for transporting data. This is down to convenience in terms of their size and easy to use plug-and-play facility.

Unfortunately their greatest asset is their greatest downfall; as small and convenient as they are, the more likely they and their data are to be misplaced, lost or stolen. This could mean the loss of sensitive customer data, a tarnished reputation and heavy fines.

Eclipt PICOfreedom addresses these concerns with its hardware-based, FIPS 140-2 level 2 validated, encryption that protects mobile data inside and outside the corporate environment. All files are encrypted 100% of the time, ensuring maximum security alongside its tamper-resistant design.

You can be sure that even when lost or stolen, data stored on Eclipt PICOfreedom remains confidential between you and your customers.

Available in 2GB, 4GB and 8GB.

FlagStone Technology ~ Hardware Encryption at its Best

FlagStone Eclipt integrates sophisticated authentication, entire disk encryption and data storage into tamper-resistant internal or portable hardware that safeguards your data. This provides instant data protection without any adverse effects on your computer's performance.
