#### INTRODUCTION

EN7-S02T is AI ultra-precision human body temperature measuring system that guarantees high-performance, high-reliability. Based on thermal imaging technology and relying on deep learning algorithms, it has fast recognition speed, high accuracy, and fast capture the face information for a 1: N comparison. During face recognition, the human body temperature will be collected for temperature measurement.

It can be used with personnel passages to achieve the rapid movement of personnel and the control of entry and exit of personnel, maximizing the efficiency of epidemic prevention. Thanks to Wiegand 26/34766 protocol (that will be implemented soon) and network connection can be integrated into your access control system. Please call our service to define details.

#### **ADVANTAGES**

- 1. The traditional temperature measuring guns need to be held by a person reducing efficiency;
- 2. All-in-one face temperature measuring machine, automatic temperature measurement by facial scanning, saving manpower and improving the efficiency;
- 3. People without masks can be accurately detected;
- 4. Automatically record abnormal temperature information of the human body and automatically count relevant person;
- 5. Adopt deep learning algorithm, support 30,000 face database, 200ms speed recognition, to achieve the rapid movement of personnel;
- 6. Support data network upload, the device comparison results and snapped photos can be uploaded to the platform for real-time storage, and data can be continuously uploaded even if the network is off.

## **TECHNICAL SPECIFICATIONS**

Model number: EN7-S02T Cameras: 2MP

Temperature detector: thermal image processing, Sony sensor

O.S.: Linux

Display: 7" IPS HD 1024 x 600, 300 CD/m2

Interfaces: RS485, RS232, RJ45, relay
Output Fill light lamp: infrared light, white light

Rated voltage: 12VDC – 12W

Panel size: 219 x 111 x 21.5 mm

Stand: 33 x 189 mm

Protection: IP66

Weight: 2,3 Kg (AN7-A110 = 24 Kg)

### **FUNCTIONAL SPECIFICATIONS**

Temperature measuring distance: 0.5 - 1.0 m (0.75 m suggested distance)

Best face recognition distance:0,5-2,2 mTemperature accuracy: $\pm 0,3^{\circ}\text{C}$ Detection range: $36^{\circ}\text{C} - 40^{\circ}\text{C}$ Human face capability:30.000Identification accuracy:99,5%Recognition speed:200 ms

Tolerance: standard glasses are allowed

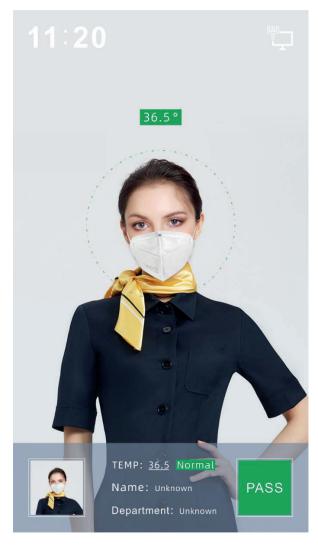

Protocols: IPv4. TCP/IP, HTTP

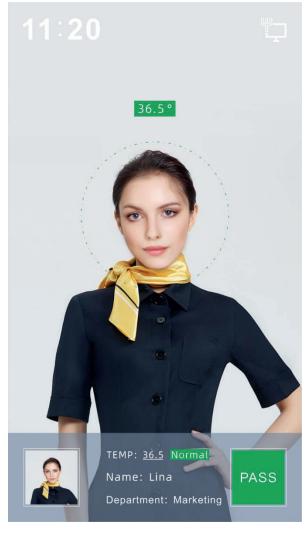

## **OPERATIVE CONDITIONS**

Operating temperature: -20°C – 50°C

Working humidity: 10%-90% no condensation

Suggested inclination: 5° - 15°

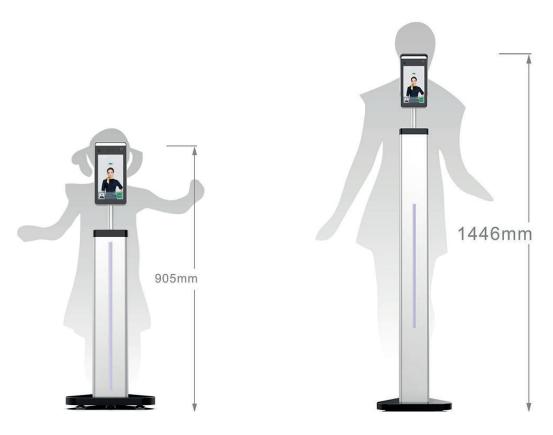

## **MODELS**

**EN7-S02T** Innovative device for Human body temperature measurement

EA7-A003 table bracket

**EA7-A060** floor pole bracket, 60 cm floor pole bracket, 110 cm

**NOTE:** EN7-S02T is not a medical device, is not a clinical thermometer and is not compliant with Directive 93/42/CEE.

CBC reserves to change and update these specifications
